thin solid films

www.elsevier.com/locate

Contents

Camphoric carbon soot: a new target for deposition of diamond-like carbon films by pulsed laser ablation
S.M. Mominuzzaman, T. Soga, T. Jimbo and M. Umeno 1

A method of studying carbon particle distribution in paint films
M. Mozetič, A. Zalar, P. Panjan, M. Bele, S. Pejovnik and R. Grmek 5

Titanium nitride thin films obtained by a modified physical vapor deposition process
P. LeClair, G.P. Berera and J.S. Moodera 9

Application of mathematical morphology in measurement of droplet size distribution in dropwise condensation
N. Maiti, U.B. Desai and A.K. Ray 16

Water absorption characteristics of fluorinated silicon oxide films deposited by electron cyclotron resonance plasma enhanced chemical vapor deposition using SiH_4, SiF_4 and O_2
K.-M. Byun and W.-J. Lee 26

High temperature materials for thin-film thermocouples on silicon wafers
K.G. Kreider and G. Gillen 32

Growth mechanisms of crystallites in the mixed-phase silicon films deposited by low-pressure chemical vapor deposition
H. Wee, C. Lee and S.-C. Shin 38

Low-temperature epitaxial growth of Si by electron cyclotron resonance chemical vapor deposition
J. Platen, B. Selle, I. Sieber, S. Brehme, U. Zeimer and W. Fuhs 47

Growth kinetics of sputtered amorphous carbon thin films: composition studies and phenomenological model
S. Logothetidis, P. Patsalas, M. Gioti, A. Galdikas and L. Pranevicius 56

Pd–Ag alloy films prepared by metallorganic chemical vapor deposition
S.-Y. Lu and Y.-Z. Lin 67

Evaluation of precursors for chemical vapor deposition of ruthenium
K.C. Smith, Y.-M. Sun, N.R. Mettlach, R.L. Hance and J.M. White 73

CuAu-I type ordering and orientation domains in tetragonal $Zn_{2-2x}Cu_xIn_xS_2$ films ($0.78 \leq x \leq 1$) crystallized on (001) gallium phosphide by pulsed laser deposition
G. Wagner, D. Oppermann, K. Bente, J. Lenzner and M. Lorenz 82

Reaction of Si(111) surface with acetone
T. Takami, S. Ishidzuka, Y. Igari, H. Range and I. Kusunoki 89

Structure and morphology of high quality indium-doped ZnO films obtained by spray pyrolysis
M. Miki-Yoshida, F. Paraguay-Delgado, W. Estrada-López and E. Andrade 99

Deposition of MgO thin films by modified electrostatic spray pyrolysis method
S.G. Kim, J.Y. Kim and H.J. Kim 110

Effect of surface impurities on the Cu/Ta interface
L. Chen, N. Magtoto, B. Ekstrom and J. Kelber 115

A novel process and thermodynamic mechanisms of air gap formation for ULSI application
K.-M. Chang, J.-Y. Yang, L.-W. Chen and M.H. Tseng 124

Effects of ion beam bombardment on electrochromic tungsten oxide films studied by X-ray photoelectron spectroscopy and Rutherford back-scattering
H.Y. Wong, C.W. Ong, R.W.M. Kwok, K.W. Wong, S.P. Wong and W.Y. Cheung 131

Preparation of hard super-hydrophobic films with visible light transmission
A. Nakajima, K. Abe, K. Hashimoto and T. Watanabe 140

Manufacturing, structure and high temperature corrosion of palladium-modified aluminide coatings on nickel-base superalloy M38
D. He, H. Guan, X. Sun and X. Jiang 144

Wear resistance of carbon nitride thin films formed by ion beam assisted deposition
T. Hayashi, A. Matsumuro, M. Muramatsu, M. Kohzaki and K. Yamaguchi 152

Microstructures and properties of PVD aluminum bronze coatings
W. Liang, X. Xiaolei, X. Jiujun and H. Zukun 159

An effective diffusion barrier metallization process on copper
W.W. So, S. Choe, R. Chuang and C.C. Lee 164

Dependence of microstructure and nanomechanical properties of amorphous carbon nitride thin films on vacuum annealing
M. Bai, K. Kato, N. Umeharab, Y. Miyake, J. Xu and H. Tokisue 170

Fractal character of circumferences of polishing-induced pull outs of plasma sprayed Cr_3C_2–NiCr coatings
J.F. Li and C.X. Ding 179
Improvement of secondary electron emission property of MgO protective layer for an alternating current plasma display panel by addition of TiO_2
R. Kim, Y. Kim and J.-W. Park 183
Phase formation in aluminium implanted titanium and the correlated modification of mechanical and corrosive properties
I. Tsyganov, E. Wieser, W. Matz, A. Mücklich, H. Reuther, M.T. Pham and E. Richter 188
Micromechanics study of thermomechanical characteristics of polycrystal shape-memory alloy films
Y.M. Jin and G.J. Weng 198
Double-layer anti-reflection coating using MgF_2 and CeO_2 films on a crystalline silicon substrate
S.E. Lee, S.W. Choi and J. Yi 208
Electronic properties of the space charge layer of in situ prepared copper phthalocyanine thin films exposed to oxygen
J. Szuber and L. Grządziel 214
Polarized electroluminescence from a uniaxially oriented polysilane thin film
Y. Ichino, N. Takada, N. Tanigaki, A. Kaito, M. Yoshida, S. Yokokawa and H. Sakurai 220
Qualitative evaluation of pyroelectric mechanisms in Langmuir–Blodgett films containing a cyclic polysiloxane substituted with aliphatic side chains using Fourier transform infrared (FTIR) spectroscopy
W.H. Abd. Majid, T.H. Richardson, D. Lacey and A. Topacli 225
PbBr-based layered perovskite film using the Langmuir–Blodgett technique
M. Era and S. Oka 232
Influence of composition on the electrical and optical properties of $Ge_{20}Bi_xSe_{80-x}$ films
H. El-Zahed and A. El-Korashy 236
Microcrystalline silicon phase in silicon oxide thin films developed by photo-CVD technique
T. Jana and S. Ray 241
Studies on the formation of microcrystalline silicon with PECVD under low and high working pressure
G. Lihui and L. Rongming 249
Indium tin oxide films prepared by radio frequency magnetron sputtering method at a low processing temperature
K. Zhang, F. Zhu, C.H.A. Huan and A.T.S. Wee 255
Critical exponents of diamond films: possible influence of spatially correlated noise
M. Cattani and M.C. Salvadori 264
Energy-resolved photon flux dependence of the steady state photoconductivity in hydrogenated amorphous silicon: implications for the constant photocurrent method
J.A. Schmidt, R.R. Koropecki, R.D. Arce, F.A. Rubinelli and R.H. Buitrago 267
